

LanoPro Lube Paste ST2 EAL

Low/Medium Load Lubricating Paste

Product Data Sheet - 2022.08.16

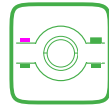

LUBRICATION

CORROSION PROTECTION

WATER RESISTANCE

GLIDING-BEARING GREASE

EAL APPROVED

2013 VGP Compliant
EAL APPROVED ACCORDING TO VGP REQUIREMENTS

Description

LanoPro Lube Paste ST2 EAL is a biodegradable lubricating paste with an inorganic thickener compound which provides excellent properties for lubrication, penetration and corrosion resistance.

LanoPro Lube Paste ST2 EAL is a grease product which is completely non-toxic and does not create an environmental footprint. Designed for maximum lubrication and protection against degradation and corrosion. The product forms a thin protective shield which is suitable for all moving parts without high pressure e.g. doors, hatches, slowly moving parts etc., or as a sliding paste. Also suitable for other open applications where there is a need for good lubrication and protection. The product is compatible with most mineral oils or other petroleum based products, a test before application is recommended.

LanoPro Lube Paste ST2 EAL is not suitable for high pressure/speed bearings or high working temperature applications.

- Good penetration properties
- Excellent low friction lubricant
- Good corrosion protection
- Readily Biodegradable

Technical Data

Properties	Test Method	Typical Values
Thickener		Inorganic
Base fluid		Proprietary blend
Colour	Visual	Clear yellow
NLGI grade	ASTM D 217 mod	2
Dropping point	IP 396	Not applicable (inorganic thickener)
Base oil viscosity at 40°C	ISO 12058	140 mm ² s
Penetration 60 strokes	ISO 2137	265-295
4-ball weld load	DIN 51350:4	<2400 N
Oil separation 168h/40°C	IP 121	<0.5 %
Water resistance at 90°C	DIN 51807:1	0
Temperature range		-10°C to +90°C

Handling

- **Storage** Handling and storage temperatures (0°C to +40°C)
- **Packaging** 400g - 5kg - 18kg - 180kg. Other on request

ID No: D 100 168:4
